Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This action is in response to paper filed August 21, 2004.

Claims 1 and 17- 20 are under consideration in this office action.

Rejections Maintained

Claim Rejections - 35 USC § 112

Claims 1 and 17- 19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The claims require an adenovirus that expresses E4 orf6 and no other early or late gene products are expressed.

Applicant argues that the specification is enabled and points to several passages in the specification, that orf6 alone is required to repair double stranded breaks, and that the invention may be practiced with the claimed vectors.

Applicant's arguments have been fully considered and not found persuasive.

First, Applicant does not address the argument in the rejection concerning orf6 expression and the expression of late genes.

Applicant argues that the invention may be practiced with the vectors and that orf6 alone repairs DNA. This is not persuasive because the claims are drawn to a product not a method.

Applicant argues that the specification enables the claims. This is not persuasive because the referred passages require limitations that are not in the claims. The specification requires orf6 alone be expressed with a heterologous promoter and that the virus be grown in non-permissive cells. The claims do not require these parts and the specification does not enable a vector as recited in the claims.

The rejection is maintained.

Claims 1, and 17- 19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The claims require an adenovirus that expresses E4 orf6 and no other early or late gene products are expressed.

Applicant argues that the specification meets the MPEP requirements for written description.

Applicant's arguments have been fully considered and not found persuasive.

First, Applicant does not address the argument in the rejection concerning orf6 expression and the expression of late genes.

The specification requires that orf6 be expressed from a heterologous promoter and that the virus be grown in non-permissive cells.

The written description does not support the claims as written.

Conclusion

No claim is allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
